Lesson 2: How Does Our Body Fight Diseases?

Name _____

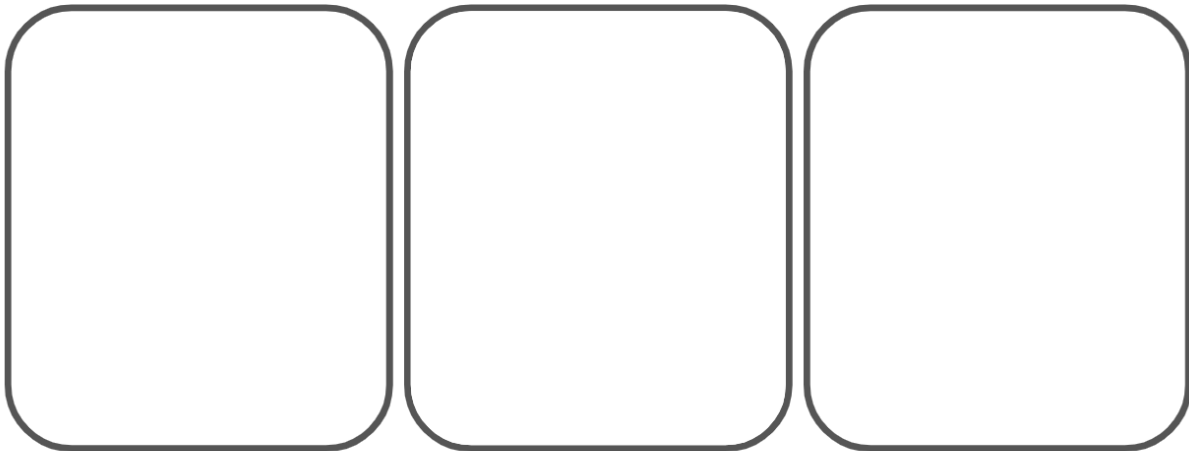

HOW VACCINES WORK QUESTIONS

1. What type of cell produces antibodies?
2. How long does it take to produce the right antibodies?
3. What are “memory” cells?
4. How do vaccines help fight disease?
5. Give an example of an mRNA vaccine:

What I've Learned

Illustrate and write a few words about three ways infectious disease can spread.

Finish the cartoon to show how vaccines help our immune system fight infectious diseases, or draw your own cartoon on the back of this paper. Add characters to represent antibodies and germs.
